Statement of Delivery:

Design Changes:

Global Element:

font: Default font. Unnecessary to implement another font since the current one is clear and understandable to audience.

Logo:

The font is (Default font...).

The size is (h1...).

The color is #F2F9FD(white).

There are 2.5px margins of every direction with the color of #83C526(green).

Product Name in every card:

The font size is 12pt,

The color of words:#000(black).

Has 0.5px shadows of every direction with the color #83C526(green);

The adjustment is for better reading and comprehensive materials.

Navigation:

font: Source Sans Pro

font size: 16 pt

Border for every navigation button is cancelled.

The adjustment is for better reading and comprehensive materials.

Content of Product Details:

The font of the whole page is default font.

The color of first level heading is #83C526(green).

The font size of first level heading is (h2...).

The first level heading has a bigger and italic style.

The color of the second level heading is #0096DF(blue).

The font size of the second level heading is (h3...).

The second level title has a italic style.

The padding of every item of lists is 10px.

The font size of the main content paragraphs is (default of p and li...).

The line height of paragraphs is 30px.

The second level list (.product-content ul li) has a 20px line height.

Navigation Indicator:

The font size is 10px.

The color style is the same as the global navigation.

The font is Source Sans Pro.

This implementation is for indicating the current location of the website.

JavaScript:

1. Resize picture when hovers over the facebook, twitter and RSS icon
2. Filter function. Take the keyword from the card when it is clicked,
if "All", show all card.

else if show the cards with selected keyword

else hide all card.

3. The picture in the product detail pages, can be clicked and resize while
the background would be dark and transparent.

Click again, the picture would hide and the page will be back to normal
state.
